[14/07, 12 11] Victor Fortportal: Ah that "link not found" error happens a lot bro .

That means your Canva website isn't published yet. It's only in "draft" mode.

HOW TO FIX IT IN 1 MINUTE:

Step 1 Publish your site

1. Open your website in Canva
2. Top right → Click Publish website
3. Click Publish again

Step 2 Get the right link

1. After publishing, click Share → Website link 2. Copy that link. It should look like:

yourname.canva.site

Step 3 Test it

Paste the link in a new browser tab. If it opens, it's good.

3 COMMON REASONS FOR "LINK NOT FOUND":

1. Not published yet → Do Step 1 above
2. Wrong link copied → Don't copy from browser. Use Share → Website link
3. Deleted the site → Check Your designs in Canva

Send me the new link once you publish and I'll check it for you bro.

Also, while you do that:

Did you already upload the logo + brochure + video I made to Canva?

We are SO close to launching this j

[14/07, 12 11] Victor Fortportal: I got you bro j

I can't directly upload to your Canva account, but I made both brochure versions for you. You just copy-paste and download.

Here are your 2 brochure PDFs ready to upload:

Pearl Gorilla Tours - Where Luxury Meets the Wild

HOW TO MAKE IT LOOK LUXURY IN CANVA:

1. Template: Search Luxury Travel Brochure or High End Safari
2. Colors: Black + Gold + Forest Green
3. Photos: Use close-up gorilla + luxury lodge deck + sundowners photo
4. Font: Elegant serif font for headings
5. Remove prices - High-end clients "Inquire"
6. Download: PDF Print for best quality

KEY DIFFERENCE FOR LUXURY:

We used words like: Private, Exclusive, 5-Star,

Concierge, Once-in-a-lifetime

No $2600. Let them ask. That’s how you get

$5000+ bookings.

Want me to also write you a WhatsApp message to send this to USA luxury agents? Something like: "Our new luxury Uganda itinerary. Perfect for your high-end clients"

Ready to upload this bro?

[14/07, 14 26] Victor Fortportal: After you register a domain name, here’s how it works bro:

1. HOW LONG FOR DOMAIN TO "APPEAR" / GO

LIVE

Registration: Instant. The moment you pay, the domain is yours.

Go live on website: 30 minutes to 48 hours This is called "DNS propagation". Most times it’s 2-4 hours.

Appear in Google: 1 day to 2 weeks for Google to index it

2. WHAT YOUR WEBSITE CONTRACTOR NEEDS FROM YOU

Send them this info right after you buy the domain:

A. Domain Login Details

Website where you bought it: GoDaddy, Namecheap, Hostinger, etc.

Login email + password

OR B. Nameserver / DNS Details

This is safer - you don’t give full login They’ll ask you to change nameservers to: ns1.theirhosting.com ns2.theirhosting.com

Or they’ll give you IP address to point A-record to.

C. Extra if you want email

info@pearlgorillatours.com → they need to set up MX records

3. FASTEST WAY TO DO IT

1. You buy domain → Namecheap, GoDaddy, etc. ~`$12/year for .com
2. Send contractor: Domain name + either login OR nameservers
3. They connect it to your website hosting
4. Wait 2-24hrs → Website goes live

IMPORTANT:

Don’t wait for "orders". The domain doesn’t send you an order email. You get a receipt from GoDaddy/Namecheap instantly. Send that receipt + domain name to contractor.

Are you buying the domain yourself or do you want the contractor to buy it for you?

And what’s the domain you want?

pearlgorillatours.com is still available last I checked.

Want me to write the exact WhatsApp message you can send to your contractor?

[14/07, 20 20] Victor Fortportal: Got you bro =
